

Hey Mark, I think I have a fix that will work. The PermitID field is empty for DW facilities (see attached Flat export). How about if we use that field to keep the TX##### number and you can use that column to sort/filter/etc

Subject: M6H1 – Harvey Response: Need Quick Help on RM Data

I really need "TX" to be added to the beginning of the water system ID in RM. When I export to Excel, it loses any leading zeros and creates a nightmare for me in preparing stuff for the field teams. I am sending teams out tomorrow, so the sooner the better.

Thanks

Mark McCasland
